

ACDCareTM

Plasma from donors vaccinated against *Clostridium perfringens* Types A, C, & D.

250 ml

Made in the USA

Manufactured by Mg Biologics

Info: ACD Care supports the performance of the gastrointestinal tract during high-stress situations by supplementing cattle, goats, and sheep with plasma from donors vaccinated against *Clostridium perfringens* Types A, C, & D.

Administration: Can be oral, subcutaneous (SQ), or intravenous (IV).

Newborn, Feeder Calves and Cattle: 10-20 ml

Suckling Lambs and Goats: 5-10 ml

Feeder Lambs and Goats: 10-20 ml

It may be beneficial to combine both SQ and oral administration using a 50/50 ratio. Oral administration may be beneficial against foreign proteins in the gut and promote a healthy biome.

Directions: Store refrigerated at 2-8°C (36-46°F). Do not administer within 21 days of slaughter. Gently invert before use. Gelling may occur when stored at near-freezing temperatures. Call manufacturer if this occurs.

Ingredients: Equine Plasma Proteins, Sodium Citrate Solution, Gentamicin as a preservative.

Precaution: Every reasonable precaution has been taken to safeguard this product. There is always the possibility, while rare, of adverse events. Hypersensitivity reactions could occur in all species. In case of anaphylaxis, give epinephrine. Always check patient history for previous equine protein exposure or a previous reaction to foreign protein biologics. Due to the potential incompatibility of equine donor blood factors, do not use in equine species. Mg Biologics makes no health claim expressed or implied with regards to the vaccination history of the donors and does not claim to cure, treat, prevent, or protect from disease.
